WATER-COOLED PACKAGED UNITS

Compact and medium-size indoor units designed for commercial and industrial applications.

They feature easy installation, reliable performance, and high-quality components, ensuring safety, durability, and operational confidence.

Available capacities: 1 TR to 30 TR.

Benefits:

Compact design

High efficiency

Low noise level

Superior durability

Easy maintenance

Backpack-Type Package Unit

Specifically designed for continuous operation, delivering reliable and consistent performance. Provides efficient indoor climate control for demanding environments.

Available capacities: 1 TR to 5 TR.

Air-Cooled Package Unit

Equipped with an air-cooled condensing system that delivers high thermal performance without the need for a water supply.

Available capacities: 3 TR to 30 TR.

COLD ROOM SYSTEMS

ADJUSTABLE SYSTEM

Easy to assemble according to project requirements.

HINGED DOOR

With secure and airtight sealing.

PANELS

High-Performance Insulation

APPLICATIONS:

Laboratories

Processing rooms

Food preservation area

Forensic services

OPEN REFRIGERATION CONDENSING UNIT

Designed to provide high efficiency and reliable performance.

Features scroll compressors and coils with copper tubes and aluminum fins, enhancing heat transfer, reducing energy consumption, and improving corrosion resistance.

Available capacities: 2 HP to 10 HP.

CABINET-TYPE REFRIGERATION CONDENSING UNIT

High-quality cabinet condensing units engineered for commercial and industrial refrigeration systems, offering efficient and dependable operation.

Available capacities: 2.0 HP to 7.5 HP.

CUBIC EVAPORATORS

Designed to ensure efficient cooling and uniform air distribution in commercial and industrial refrigeration systems.

Ideal for cold rooms, warehouses, and perishable goods storage areas.

Available capacities: 9,000 to 42,000 BTU/h.

CASSETTE FAN COIL UNIT

Designed to integrate seamlessly into any space, providing constant comfort without compromising aesthetics.

Ensures uniform air distribution and reliable operation.

Ideal for offices, retail stores, and commercial spaces requiring efficient temperature control.

Features a decorative grille with a premium finish, enhancing overall presentation.

Available capacities: 24,000 to 60,000 BTU/h.

Versions: Direct Expansion or Hydronic (Chilled Water).

Four-way air distribution

Temperature control

Eco-friendly refrigerant R-410A

Low noise level

FLOOR/CELLING FAN COIL UNIT

A versatile and efficient solution for conditioning large spaces.

Can be installed on the floor or ceiling, adapting easily to different environments.

Its robust construction ensures durability and long-term performance.

Available capacities: 24,000 to 60,000 BTU/h.

Versions: Direct Expansion or Hydronic (Chilled Water).

Remote control

Eco-friendly refrigerant R-410A

Low noise level

DUCTED FAN COIL UNIT

Designed for discreet ceiling installation, distributing air quietly and efficiently through ductwork.

Available capacities: 24,000 to 60,000 BTU/h.

Versions: Direct Expansion or Hydronic (Chilled Water).

Anticorrosive protective coating

Easy maintenance

Compact design

AIR CURTAIN

Creates an invisible air barrier that prevents dust, insects, and contaminants from entering while keeping conditioned air inside.

Ideal for retail stores, restaurants, warehouses, and commercial entrances, improving comfort and hygiene without restricting access.

Available lengths: 0.90 m to 1.80 m.

Easy maintenance

Compact design

Remote control

Efficient air barrier

ON/OFF & INVERTER CONDENSING UNIT

Commercial condensing units designed to meet the demands of high-performance air conditioning systems.

Available capacities:

- On/Off: 24,000, 36,000, 48,000, and 60,000 BTU/h.
- Inverter: 36,000 and 60,000 BTU/h.

AIR HANDLING UNIT (AHU)

Provides precise airflow control for air conditioning systems in large spaces requiring uniform air distribution.

Available capacities: 36,000 to 60,000 BTU/h.

Easy installation
and maintenance

Compact
design

Copper
coil

Success Case: Telecaribe Renovation

In response to client needs, we completed a full HVAC system retrofit for Telecaribe, replacing outdated equipment with next-generation ConfortFresh technology.

The project included new air handling units, condensing units, and packaged systems, improving overall efficiency and thermal performance while ensuring reliable and stable climate control.

INVERTER MINISPLIT

Provides efficient air conditioning, continuously adapting to the needs of the space.

Inverter technology modulates compressor speed to maintain optimal temperature while reducing energy consumption and operating costs.

Available capacities: 9,000 to 36,000 BTU/h.

ON/OFF MINISPLIT

Ideal for users seeking efficient air conditioning without complications.

Designed to adapt to any environment, these systems offer simple operation and reliable performance, ensuring consistent comfort in homes and offices.

Available capacities: 9,000 to 36,000 BTU/h.

PORTABLE AIR CONDITIONER

Ideal for users seeking flexibility and convenience.

Its compact design and built-in wheels allow easy movement between rooms, providing cooling exactly where it's needed.

Available capacity: 12,000 BTU/h.

DEHUMIDIFIER

The perfect solution to keep spaces free from excess humidity, protecting interiors and improving indoor air quality.

Features adjustable humidity control, LED display, and an easy-drain water tank.

Available capacities: 60 and 70 pints.
